

# Growers Guidelines

## Kale

### Seed Rate

2kgs per acre drilled, 3kgs acre broadcast.  
Pack size supplied 1kg Natural seed.

### Sowing

Method	Drill or broadcast
Depth	0.5 - 1 inches
Row Width	21 - 24 inches
Timing	April – June

### Soil

Type preferred	Wide range of soil types. Try not to follow other brassica crops as this could lead to club root problems.
Seed Bed	Firm and fine, aim to retain moisture.
Fertiliser	100kg N/ 50kg P/ 120kg K per hectare

### Management

Weed Control	Contact your local UAP agronomist for the best advice about your crop.
Pests	Kale can be susceptible to flea beetle attacks when seedlings are young. Choose Combicoat treated seed if possible.
